SUMMARY

An AI product engineer at the Seoul Robot & AI Science Museum who builds AI into working products, from the data pipeline to the deployed interface, and keeps them running where people use them. My Art Lab ran on the floor through June–July 2026, growing from 3,049 images to 8,000+; for Doctor-Green I built the training set myself: 39,889 lesion crops with a group-aware stratified split.
