SUMMARY

A product engineer who builds things people learn from, at the Seoul Robot & AI Science Museum. I build end to end, sensor to shipped interface, and the other half of this job is teaching it: a smart-farm curriculum commissioned by Yangpyeong Education Office. My Art Lab runs live on the floor, growing from 3,049 images in June 2026 to 8,000+ in July; Doctor-Green diagnoses 7 strawberry-disease classes from live video.
